PROJECTS

Butterfly- Book Exchange Platform Client-Site-GitHub | Server-Site-GitHub | Live-URL
Development Time: October 2024
A web application connecting readers to exchange and share books, fostering a community of book lovers.
My Contributions:

- **Role**: Both Front-end & Backend
- **Frontend:** Developed key pages, especially the Dashboard.
- **Backend:** Built Prisma schema, CRUD operations, and tested all APIs.

Features:

- AI-driven book detail autofill, real-time post previews, and coin rewards.
- Community posts with likes, comments, follows, and image sharing.
- AI-powered text restoration for damaged book pages.

Technologies Used: Next.js, Node.js, Express.js, PostgreSQL, Prisma, Next Auth, Zest, etc..

Exclusive-E-commerce Website GitHub-Repository-Link | Live-URL
Development Time: August 2024
A fully functional e-commerce platform with Stripe payments, product reviews, wishlists, and a cart system, developed with TypeScript and the MERN stack.
Features:

- Secure payment processing.
- Save products to wishlist and cart with localStorage.
- Users can review products and track their purchases.

Technologies Used: React.js, TypeScript, Node.js, Express.js, MongoDB Firebase, Stripe, Web3form, JWT Authentication.

JobQuest - Job-seeking website. Client-Site-GitHub | Server-Site-GitHub | Live-URL
Development Time: May 2024
A job-seeking platform offering categorized job listings, secure user authentication, and efficient job application tracking.
Features:

- Browse jobs by category (On-site, Remote, Hybrid, Part-time)
- Post and manage job listings for employers
- Efficient job search and application tracking

Technologies Used: React.js, Node.js, Express.js, MongoDB, JWT Authentication, Firebase.
